The Rocky Road to a Better Channel 8

The effort to improve audio and video on Channel 8 was not a smooth one. However, since mid-December it's clear that it was a successful one.

Beginning in October SPACO began a rebuild and reconfiguration of the hardware and software used to run the station. Prior to the rebuild there had been irritating audio problems, that have been continually worked. A top notch team of staff, board members and technicians took the station apart, re-cabled it, replace equipment, and upgrade obsolete items.

As a result of this rebuild, we are providing LIVE Selectmen Meetings with audio that is clearer than ever before. These improvements have created a more stable & reliable station. *SPACO appreciates your patience.*

Shirley Middle School Program Grows

SPACO has taught an 8th grade media literacy and television production course at the Shirley Middle School for several years. This year the program was expanded to include the 7th grade as well. Students are currently creating commercials, a talk show, newsbreaks and a "soap" opera.

Tune in this Spring to see the SMS Show!
